Exercise C

Possible answer.

Earthquakes are natural disasters that can result in serious injuries, so knowing what to do in an earthquake can save your life. Here is a list of things to remember if you are ever caught in an earthquake. First and most important, drop to the ground when you start to feel the ground shaking. If you're standing up, you could fall and hurt yourself. Second, look for a table or another piece of furniture and take cover. This will help protect you from breaking glass or things that fall. Do not move from that place until the shaking stops. Next, check for injuries and damage. See if you can find your way out. Finally, when the shaking stops, move slowly away from where you are. Be careful not to trip over fallen objects.
